INTRODUCTION

This encyclopaedia is not only about facts - it is about voice. The voice of Gilan, a land of mist, mountains, rice fields, and resistance. It is a journey through memory, from the roots of ancient thought to the rituals of daily life. This work restores Gilan's place not on the margins of Iranian history, but at its heart - as a region of originality, philosophical depth, and cultural dignity.

Sample Entry: Gilaki Language - The Living Heritage of Deylaman

The Gilaki language is not merely a means of communication - it is a mirror of the region's soul. As a northwestern Iranian language, it preserves ancient words, poetic rhythm, and expressions of communal wisdom. Divided into three main dialects (Biehpish, Biehpas, and Galeshi), it reflects both the geography and psyche of its speakers.

From lullabies to epic tales, from metaphors rooted in nature to proverbs rich in local logic, the language carries the essence of the Deylamani people - independent, reflective, rooted. In an age of

linguistic homogenization, Gilaki reminds us that every word carries a world.
